1. Hero

Eyebrow	**Emergency Response Alliance**
Headline (h1)	**Location. Capture. Improve. Respond.**
Description	**From critical incidents to daily operations, ERA orchestrates work across your entire organisation.**

2. The Problem (Message Cards)

Section title: Compliance Gaps

CTA: See How ERA Works

#	Tag	Message
1	gap	Emergency procedures exist on paper — but they're not connected to the people responsible for carrying them out.
2	gap	Warden roles, responsibilities and training records change — yet there's no reliable system keeping them aligned or up to date.
3	gap	When incidents occur, visibility breaks down. Decisions rely on calls, assumptions and manual follow-up — leaving gaps in accountability and evidence.
4	solution	ERA connects your people, sites and responsibilities into one coordinated workflow — giving you clear oversight, real accountability and scalable compliance from a single location to an entire property portfolio.

3. Introducing ERA (Platform Overview)

Field	Content
Lead-in	INTRODUCING ERA
Headline (h2)	One platform. One workflow. Complete Readiness.
Subtitle	ERA replaces fragmented systems with a central coordination engine — turning plans into action and action into proof. A mobile-first system — built for real incidents, not just audits. Stay in control with real-time accountability and clear *next* actions.
CTA	See How It Works

Pillar Cards:

#	Title	Description
1	CRITICAL	**Respond with structure. Move with clarity.** - When it's real, ERA becomes your live coordination layer. - Wardens see area status in real time. - Chat rooms align search zones. - Safe lists track accountability. - Global tasks guide action. Simulation mode uses the same workflow — so drills mirror reality.
2	CAPTURE	**Turn observations into action.** - Spot a hazard. Snap a photo. Log it in seconds. - ERA captures hazards, inspections and operational issues into a structured register — with ownership, deadlines and follow-up. Every entry feeds the workflow. Nothing gets lost.
3	IMPROVE	**Build competency. Close gaps.** - Map roles to required competencies under AS3745 and WHS obligations. - Track training, forecast expiries and monitor readiness scores. - Debriefs and incident findings automatically feed back into learning and task allocation. Experience becomes measurable improvement.
4	MY SITE	**Define structure. Maintain oversight.** - Assign areas, wardens and responsibilities. - Manage evacuation diagrams, emergency plans and compliance documents. - Oversee one site or multiple properties from a single control layer. Everything reflects your role and level of access.

4. Social Proof (Testimonials)

Section heading: Trusted across Australia and New Zealand

Portfolio / Property Management	"I manage up to 70 sites across the metro area, covering businesses of all sizes. ERA gives me complete oversight across my portfolio. Its ease of use allows tenants to meet their WHS obligations — while reducing our collective liability as a PCBU."	**Toby Bridges** Senior Asset Manager (MLV / McGees) Ex Senior Associate Director (CBRE)
National / ISO / Corporate	"As an ISO-accredited company operating 20 locations across Australia and New Zealand, our compliance obligations are extensive and resource-intensive. With ERA, every drill, training certificate and incident report is centralised — significantly reducing audit preparation time. Over the past three years, the platform has delivered substantial savings in training delivery through remote simulation and reduced administrative overhead across our 300+ regional workforce. The ERA team continues to seek our feedback and refine the system to meet our evolving operational needs."	**Ryan Kinners** HSE Manager (CSE Global)
SME / Owner-Operator	"As a small business owner, I simply don't have the time or resources to keep up with growing WHS requirements. ERA makes it manageable. It ensures I meet my obligations as a PCBU through a simple, mobile-first system that keeps everything in one place. We even use it to track hours onsite, reducing unverified labour and streamlining payroll. I can manage my business from anywhere."	**Steven Middleton** Business Owner (Easy Scaffolding)

8. Compliance

Lead-in: COMPLIANCE

Headline: Your obligations, covered.

Paragraph: ERA is built around the core standards governing emergency planning and workplace safety in Australia. Compliance isn't an add-on — it's the foundation of the platform.

From Australian Standards to WHS Regulations and ISO-aligned management systems, ERA structures your procedures, training and documentation into one auditable workflow.

Standard	Description	Checklist
AS 3745-2010	Planning for emergencies in facilities	Emergency planning procedures · Emergency Control Organisation (ECO) structure · Warden training requirements · Evacuation drill standards
AS 4083-2010	Planning for emergencies — Health care facilities	Healthcare-adapted emergency procedures · National emergency colour codes (e.g. Code Red, Code Blue) · Patient mobility and safety considerations
WHS Regulations	Workplace health and safety legal obligations	Risk registers · Incident reporting · Training & competency records · Emergency preparedness workflows
ISO 45001	Occupational health & safety management systems	Systematic hazard identification · Continuous improvement framework · Audit-ready documentation · Performance monitoring

Complying with recognised Australian Standards such as AS 3745-2010 and AS 4083-2010 is widely regarded as best practice for PCBUs seeking to meet their duty of care under WHS legislation.

ERA embeds these requirements directly into structured workflows — helping ensure procedures are not only documented, but actively managed and defensible.
